<ul style="list-style-type: none">• Approximately 40 hours• 30% of qualification• 100 marks	<ul style="list-style-type: none">• A task that assesses your knowledge, understanding and skills in relation to the development, health, well-being and resilience of children and young people in Wales and requires you to produce an information resource for someone planning a future career in the childcare sector.	

What skills will I develop?

By studying Health and Social Care and Childcare, you will be able to demonstrate that you:

- understand the ethical, social and political issues affecting the health and social care and childcare sectors.
- have an awareness of the principles and values which underpin health and social care and childcare
- understand the child-centred or person-centred approaches to care.
- can interpret and evaluate theories in health and social care and childcare, and reflect on how they affect the provision of services.
- can identify the sociological, psychological and biological factors that contribute to good health, and explain the role of government and professionals in promoting and maintaining good health.

This course provides a coherent, satisfying and worthwhile course of study for you even if you do not progress to further study in this subject. It provides a suitable foundation for the study of health and social care and childcare through a range of higher education courses, or into employment
